

INDEX TO VOLUME 69 OF THE JOURNAL OF CAVE AND KARST STUDIES

IRA D. SASOWSKY & ELAINE L. Butcher

Department of Geology and Environmental Science, University of Akron, Akron, OH 44325-3641, USA, ids@uakron.edu

This index covers all articles and abstracts published in volume 69 parts 1, 2, and 3. Selected abstracts from the 2007 Society convention in Marengo, Indiana are included.

The index has three sections. The first is a **Keyword** index, containing general and specific terms from the title and body of an article. This includes cave names, geographic names, etc. Numerical keywords (such as 1814) are indexed according to alphabetic spelling (Eighteen fourteen). The second section is a **Biologic** names index. These terms are Latin names of organisms

discussed in articles. For articles containing extensive lists of organisms indexing was conducted at least to the level of Order. The third section is an alphabetical **Author** index. Articles with multiple authors are indexed for each author, and each author's name was cited as given.

Citations include only the name of the author, followed by the page numbers. Within an index listing, such as "Bats", the earliest article is cited first.
